Hi Ken,
Thanks so much for putting this together so quickly. I really appreciate it.

Toby

Hi Toby,

The attached file has the data that covers your request.

Toby's Great Bay request: Data constrained by the dates that were used for the 2014 303d list cycle evaluation.

- 1. Kd values for Squamscott River North*
- 2. Nitrogen species for Little Bay, Bellamy, Upper Piscataqua, Portsmouth Harbor and Little Harbor/Back Channel*

Note that the data was pulled using the same query that one accesses via the online data access from our mapping tool with the caveats that;

- a suite of AUIDs were fed into the query;
- the data was constrained to a the requested parameters;
- chronic and acute dataloggers statistics and the "Final Summary" information was not included;
- The "READ ME" tab that you see from the online data access from our mapping tool has been included with sever strike-outs for the components omitted as described above.

Please let me know if you have questions,
Ken
